Joey Cham

Co-Founder and CEO

Axon Labs Limited.

Joey Cham is the co-founder and CEO of Axon Labs Limited. He led his engineering team to develop innovative A.I. products such as a visual product search engine - CORTEX. He and his company were awarded the Grand Award in ICT Awards 2015 and IoT Hero Award 2016. Prior to founding his company, Joey worked in a government-founded R&D centre, responsible for leading and carrying out data analytics projects in collaboration with HP and Hong Kong Police Force. Joey obtained his PhD in Vision Science in 2009.

About Axon Lab Limited

Axon Labs Limited has the vision of empowering human intelligence with machine intelligence through different applications. We develop new technologies and high-quality products by conducting cutting-edge researches in machine intelligence. We employ our knowledge and expertise in machine intelligence to enhance the productivity and amplify business value of enterprises. We create new applications for better society well-beings.

Axon Labs Limited was founded in 2011. Our developed and operating apps have been downloaded over 1,000,000 times in total. HKBus+ provided the most complete Hong Kong's public transport information and received the Hong Kong ICT Awards 2015 Grand Awards. We are also experienced in developing reliable and scalable cloud services which can support a large number of concurrent users.
