Cyberport Career Fair 2025 Offers Over 2,000 Job Vacancies

*Unveiling AI Career Opportunities and Promoting Job Matching to
Expand the Tech Talent Pool*

Hong Kong, 17 March 2025 – Cyberport Career Fair 2025 will be held on 21 and 22 March, with this year's theme being "Unveiling AI Career Opportunities." The event highlights the emerging workplace opportunities brought by artificial intelligence (AI), aiming to support young individuals eager to join the tech sector to harness the vast potential unleashed by AI technology, and facilitate job matching to bolster Hong Kong's pool of tech talent. The Career Fair offers over 2,000 job vacancies from more than 580 companies and organisations, including Cyberport community start-ups, large enterprises, tech companies, government departments, and public organisations. Among these, approximately 60% of the positions are related to AI application, and about 70% of employers are actively recruiting AI talent. The event will feature 100 physical booths with the introduction of AI technology services, such as AI Interviewer that allows job seekers to evaluate their interview performance, on-site CV Clinic, one-on-one professional consultation service, personality test and analysis, AI CV photo shooting, career counselling, etc., to comprehensively enhance job seekers' employment prospects.

Ir Eric Chan, Chief Public Mission Officer of Cyberport, said "The rapid development of Artificial Intelligence (AI) is driving explosive growth in industry scale and application demand, not only generating new industries and services but also empowering various sectors to upgrade and transform, creating unprecedented employment opportunities. This year's Cyberport Career Fair focuses on unveiling AI career opportunities and is co-organised with the Hong Kong Federation of Youth Groups (HKFYG) for the first time, aiming to open broader career paths for young people. As Hong Kong's digital technology flagship and AI hub, Cyberport has always been committed to nurturing tech talent and acting as a bridge connecting enterprises with talent. This year's Career Fair not only sets a new record in the number of participating companies but also enhances the precision and efficiency of job matching through the in-depth application of AI technology, providing job seekers with a seamless experience. We look forward to the two-day event that matches more ideal talent with tech enterprises, injecting new momentum into Hong Kong's innovation and economic development."

This year, the Career Fair will continue to adopt a hybrid format of both online and physical event in action. Start-ups, technology companies, large enterprises,

government departments, and public organisations are joining in, including Hang Seng Bank, Centaline Property, JobsDB by SEEK, Hewlett Packard Enterprise, FUJIFILM Business Innovation Hong Kong, solution developer and system integrator Roctec, Greater Bay Area innovation and entrepreneurship platform Hex Cubes, PCCW/HKT, human resources company Manpower Group, and Dah Chong Hong Holdings. Government departments in participation include the Digital Policy Office, Hong Kong Police Force, and Labour Department participating in the Greater Bay Area Youth Employment Scheme (GBAYES). Public organisations include event co-organiser HKFYG and St. James' Settlement. Cyberport community start-ups such as artificial intelligence of things (AIoT) company Negawatt Utility, Wizpresso, VoteeAI, and BridgeAI will also be present

Cyberport enterprise TechJobAsia continues to be a partner of the Career Fair this year, introducing its self-developed, Asia's first interactive interview and analysis platform – AI Interviewer. This platform engages job seekers in real-time interactive dialogues and in-depth questions specific to job requirements. It then provides job seekers with performance scores and reports, allowing them to evaluate their interview performance. In conjunction with the on-site CV Clinic, this platform aims to improve job seekers' chance of employment while assisting recruiting companies with streamlined interview screening processes and thus enhanced recruitment efficiency.

AI is rapidly reshaping the job market. According to TechJobAsia's data, 34% of professionals are considering switching to AI-related careers, while 76% of Hong Kong employers plan to retrain their IT staff to fill AI job vacancies. Market trends show that 40% of junior job seekers with 0 to 3 years of experience already possess AI-related qualifications, such as a minor study in AI or online course certificate. The high demand for AI talent is also reflected in salaries, with junior AI engineers earning between HK\$24,000 and HK\$31,000 per month on average, and positions requiring AI skills offering up to 24% higher salaries than similar roles without such requirements.

The two-day Career Fair will feature over 280 activities, including forums, recruitment talks, and CV clinics, with a line-up of industry experts to explore latest developments in the I&T industry and job market, employment opportunities brought by AI, how AI empowers diverse talents, and how to get ready for the next phase after the AI surge. Start-ups nurtured by Cyberport will also share stories of their entrepreneurial journeys at the event.
