**For Immediate Release**

## **Cyberport Career Fair 2025 Commences**

*AI-driven Workplace Evolution with Over 2,000 I&T Job Vacancies from more than 580 organisations*

**Hong Kong, 21 March 2025** – Cyberport Career Fair 2025 officially commenced today, with **Simon Chan, Chairman of Cyberport** and **Dr Rocky Cheng, CEO of Cyberport**, alongside **Siu Chak-ye, Commissioner of Police**; **Duncan Chiu, Legislative Council Member (Technology and Innovation Constituency)**; **Donald Mak, Deputy Commissioner (Data Governance) of Digital Policy Office**; **Anna Au, Deputy Director of Hong Kong Talent Engage**; **Tori Chan, Principal Assistant Secretary for Home Affairs Bureau (Youth Affairs)**; and **Hsu Siu-man, Executive Director, Hong Kong Federation of Youth Groups (HKFYG)** officiating the Kick-off Ceremony. This marked the start of the two-day event which gathered tech talent across the territory.

The Career Fair has received an overwhelming response, joined by more than 580 companies and organisations, including Cyberport community start-ups, large enterprises, technology firms, government departments, and public organisations, offering over 2,000 job vacancies. This year's event, themed "Unveiling AI Career Opportunities", focuses on exciting new career prospects brought by Artificial Intelligence (AI). For the first time, this event is co-organised with Hong Kong Federation of Youth Groups (HKFYG) to jointly help young people explore career paths in the innovation and technology (I&T) field.

**Simon Chan, Chairman of Cyberport**, said in his speech, "Artificial intelligence is rapidly transforming the labour market, with enterprises expected to undergo significant transformations driven by AI advancements, and thus creating new job opportunities. This evolution has also heightened the demand for AI talent and related skills across industries. As Hong Kong's digital technology hub and AI accelerator, Cyberport firmly believes that talent is the cornerstone of future development of innovation and technology. Cyberport has always served as a vital bridge for talent cultivation, providing platforms for the I&T industry to showcase their diverse growth. At the same time, we inspire young individuals to pursue careers in I&T, ensuring a continuous influx of skilled professionals into various sectors. This year's Cyberport Career Fair focuses on AI-related fields and application, highlighting the immense potential and opportunities within the AI industry. We look forward to collaborating with the Hong Kong Federation of Youth Groups, other supporting organisations and participating enterprises through this annual event to collectively foster I&T talent, thereby strengthening the local talent pool in this thriving sector."

**The Honourable Duncan Chiu, Legislative Council Member for the Technology and Innovation Constituency**, remarked in his speech, "For many years, Cyberport has been a pioneer in promoting technological development and talent cultivation, and blazed a trail by initiating Cyberport Career Fair over a decade ago, which has run annually for 11 years in a row up till this edition. It has brought quality employment opportunities to the youth, encouraging them to join the I&T sector and building the talent pipeline in Hong Kong. As Hong Kong and the world have entered the 'AI Everywhere' era, industries increasingly pivot to AI applications and their disruptive impact on different professions. The demand for AI application experiences and skills is growing across sectors, and so how to train the next generation capable of harnessing AI advantages, bears heavily on Hong Kong's continued enhancement of its competitiveness. As Cyberport will be a stronghold in AI, we can leverage its platform and various training institutions to cultivate more AI talents in Hong Kong."

Cyberport Career Fair enters its 11<sup>th</sup> edition this year and continues to adopt a hybrid format, featuring both online and physical events. Participating companies include Hang Seng Bank, Centaline Property, JobsDB by SEEK, Hewlett Packard Enterprise, FUJIFILM Business Innovation Hong Kong, solution developer and system integrator Roctec, Greater Bay Area innovation and entrepreneurship platform Hex Cubes, PCCW/HKT, human resources company Manpower Group, and Dah Chong Hong Holdings. Government departments in participation include the Digital Policy Office, Hong Kong Police Force, and Labour Department participating in the Greater Bay Area Youth Employment Scheme (GBAYES). Public organisations include event co-organiser HKFYG, and St. James' Settlement. Cyberport community start-ups such as artificial intelligence of things (AIoT) company Negawatt Utility, Wizpresso, VoteeAI, and BridgeAI, etc. will also be present. Among the participating employers, approximately 70% are actively recruiting AI specialists, while 60% of the job openings are related to AI application. This reflects the market's pressing demand for relevant technological talent and underscores the strategic opportunities that manifested in Hong Kong's vision of becoming an international I&T hub.

The event features over 100 physical booths, while also showcasing cutting-edge AI-driven services, in keeping with the AI theme. That include Asia' first AI-enabled interactive interview and assessment platform – AI Interviewer – developed by TechJobAsia, a Cyberport company. This innovative platform helps job seekers evaluate their interview performance through real-time dialogues and in-depth questions about industry-specific knowledge. In addition, an array of on-site activities, including CV Clinic, one-on-one professional consultation, personality test and analysis, on-site AI CV photo shooting, career counselling, etc. are also available to comprehensively enhance job seekers' employment prospects.

The two-day Career Fair will feature over 280 events, including forums, recruitment talks, and CV consultation sessions. Industry experts will be invited to discuss latest trends in the I&T sector and new career opportunities brought by AI. As a result, participants will gain a deeper understanding of emerging opportunities across various industries and will be better

equipped for a workplace where AI is becoming ever more prevalent. In addition, start-ups nurtured by Cyberport will share stories of their entrepreneurship journeys as well as the challenges and opportunities in the Greater Bay Area. Participants can also refine their CVs and reform their careers through Upskilling Workshops that help them pave the way for their future career.

Cyberport Career Fair 2025's online platform (<https://ccf.cyberport.hk>) will remain accessible from today until June this year. Candidates can browse job vacancies, participate in online CV reviews and submit applications at their convenience.

**About Cyberport**

Cyberport is Hong Kong's digital technology flagship and incubator for entrepreneurship with over 2,200 members including over 900 onsite and over 1,300 offsite start-ups and technology companies. It is managed by Hong Kong Cyberport Management Company Limited, wholly owned by the Hong Kong Special Administrative Region Government, and committed to the vision to inject new impetus into digital economy and smart city development through innovation and technology, and to connect enterprises to Mainland China and overseas markets. Cyberport strives to nurture a vibrant tech ecosystem by cultivating talents, promoting entrepreneurship among the youth, supporting start-ups, fostering technology industry development by promoting strategic collaboration with local, Mainland Chinese and international partners, and integrating new and traditional economies by accelerating digital transformation in public and private sectors.
